

Electronic Engineering (ELE):

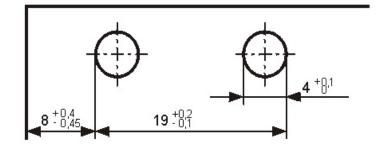

ENGINEERING DESIGN EXERCISE 5: DIMENSIONING

Engineering Design: Dimensioning Aspects of Dimensioning

The **purpose of a drawing** sets the dimensioning of the features of an object:

(1) Function-related Dimensioning:

Each dimension gets the maximum tolerance related according to the influence on the function.

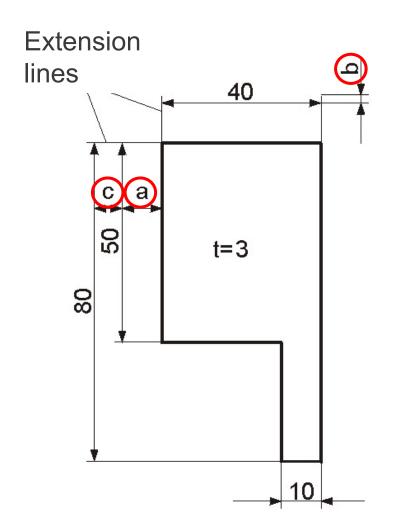

(2) Manufacturing-related Dimensioning:

Each shown dimension can be used in the production without further calculations.

(3) Testing-related Dimensioning:

Each shown dimension can be used in testing without further calculations.

Engineering Design: Dimensioning Rules of Dimensioning

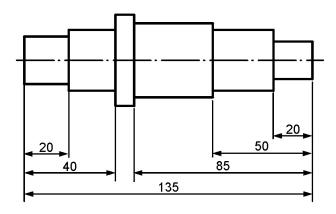

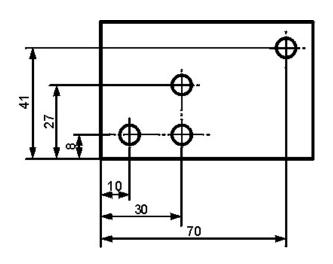

Dimension and extension lines are narrow continuous lines **0.35 mm thick**, if possible, clearly **placed outside** the outline of the drawing.

- a Distance dimension line- outline > 10 mm
- **b** Overlap extension line 1 2 mm
- c Distance of two dimension lines > 7 mm

A gap between the feature and the extension lines is permissible (8 x extension line width).

Engineering Design: Dimensioning Rules of Dimensioning

Reading direction of a drawing:

Values shall be indicated so that they can be read from the **bottom** or **right-hand side** of the

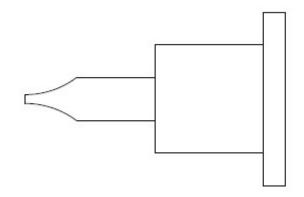

drawing.

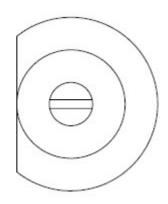

Agenda

- 1. Exercise 7.1 7.4
- 2. Additum

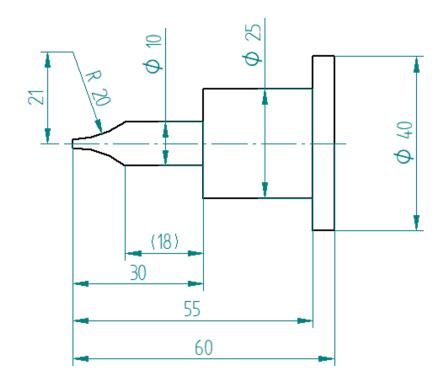

Exercise 7.1: Dimension the shown part manufacturing related!

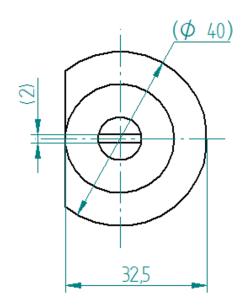

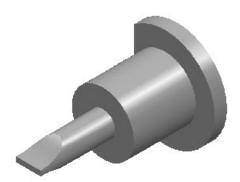

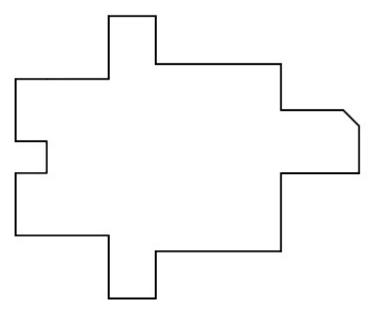

Exercise 7.1: Dimension the shown part manufacturing related!

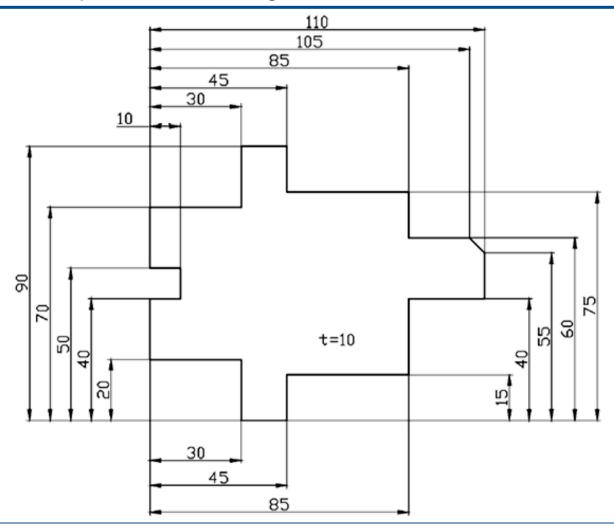

Exercise 7.2: Dimension the shown part manufacturing related! Thinkness in t=10 mm

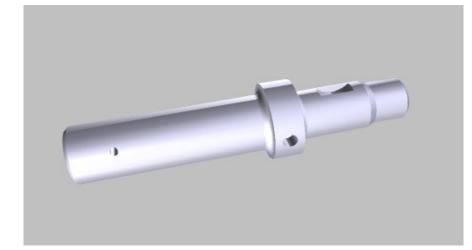

Exercise 7.2: Dimension the shown part manufacturing related! Thinkness in t=10 mm

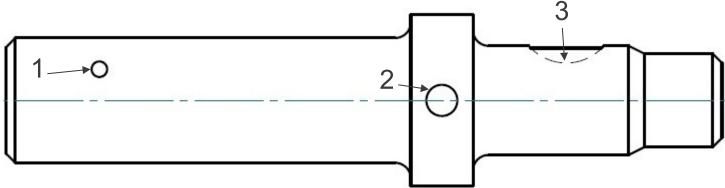

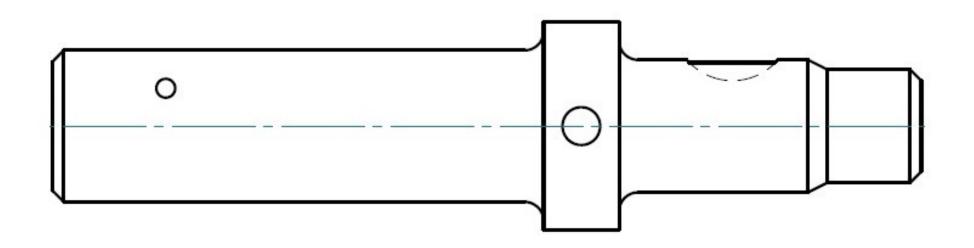

Exercise 7.3: Draw the shaft with all necessary views/sections. Dimension the drawing.

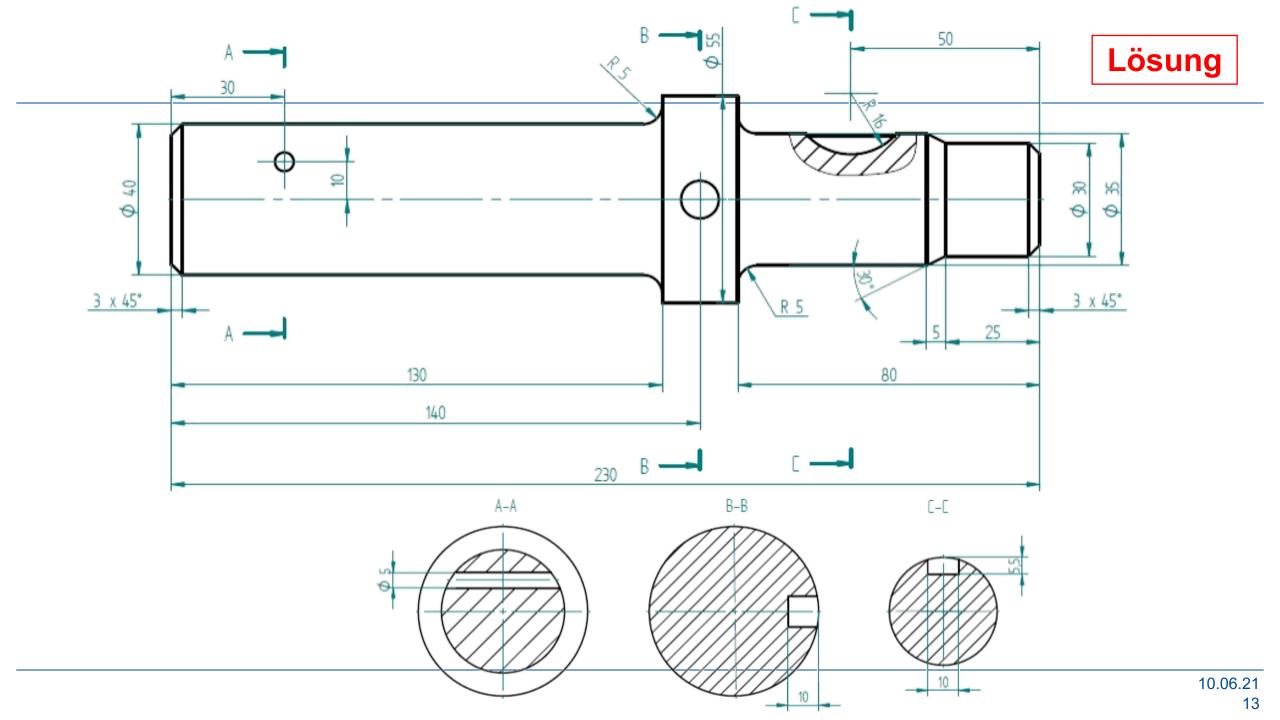

Additional Information:

- Drilling 1 is thraough all with 5 mm diameter.
- Drilling 2 has a diameter of 10 mm and a depth of 10 mm
- For the key (R 16) the notch (3) has a width of 10 mm and a maximum depth of 5,5 mm

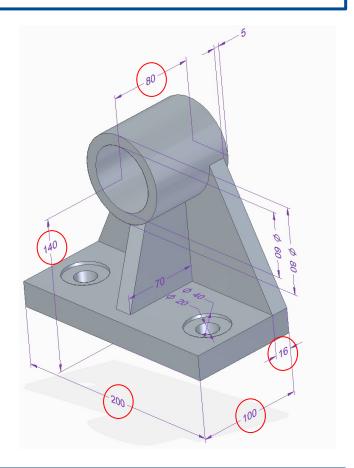

Exercise 7.4: Draw the shown part in all necessary view. Use the tolerancing table for the dimensioning. Add missing Dimension on you own.

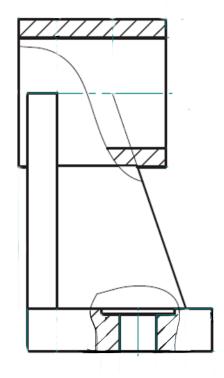

Hinweise:

All marked Dimensions have to be toleranced according to DIN-ISO 2768-mK (tabular below)

Toleranz- klasse	Grenzabmaße in [mm] für Nennmaßbereiche in [mm]							
	0,5 bis 3	> 3 bis 6	> 6 bis 30	> 30 bis 120	> 120 bis 400	> 400 bis 1000	> 1000 bis 2000	> 2000 bis 4000
f (fine)	± 0,05	± 0,05	± 0,1	± 0,15	± 0,2	± 0,3	± 0,5	
m (medium)	± 0,1	± 0,1	± 0,2	± 0,3	± 0,5	± 0,8	± 1,2	± 2
c (coarse)	± 0,2	± 0,3	± 0,5	± 0,8	± 1,2	± 2	± 3	± 4
v (very coarse)		± 0,5	± 1	± 1,5	± 2,5	± 4	± 6	± 8

Agenda

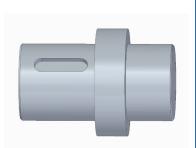

- 1. Exercise 7.1 7.4
- 2. Additum

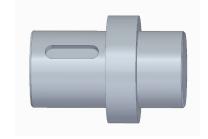

Exercise 7.5: Draw all necessary views and dimension the drawing!

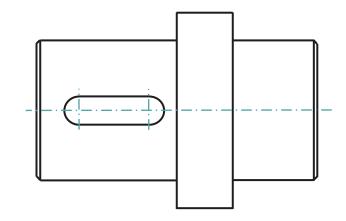

Hint:

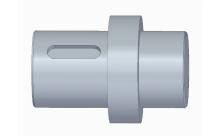

- Depth of notch (2) is 5 mm.
- Measure the other dimension from the drawing.

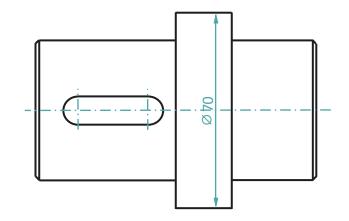

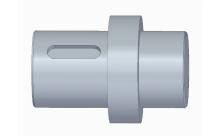

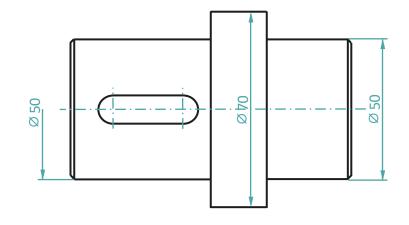

Diameter

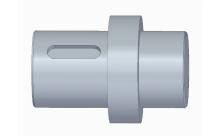

start with maximum diameter

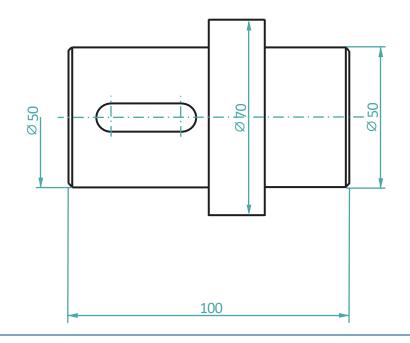

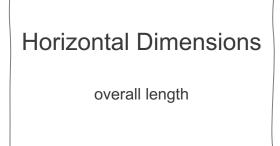

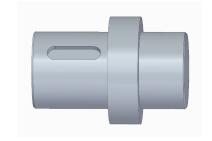

Diameter

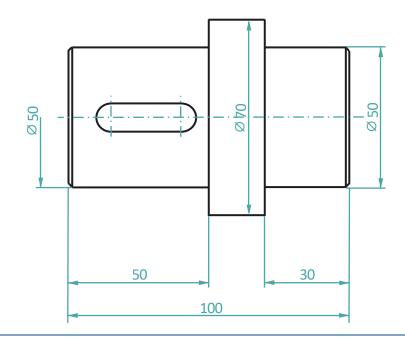

stepwise to the smaller diameters

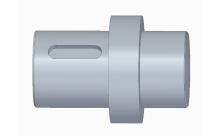

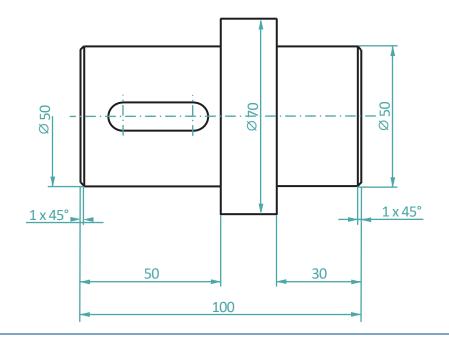

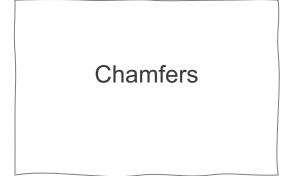

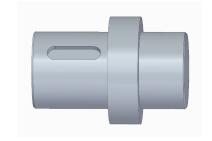

Horizontal Dimensions

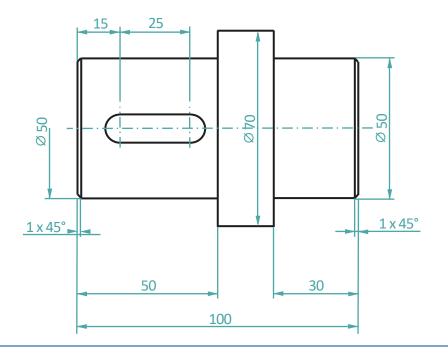

from reference plane to inside

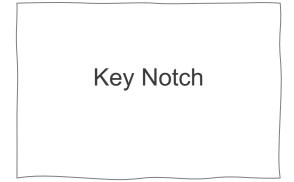

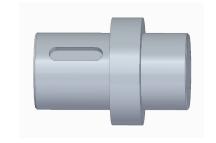

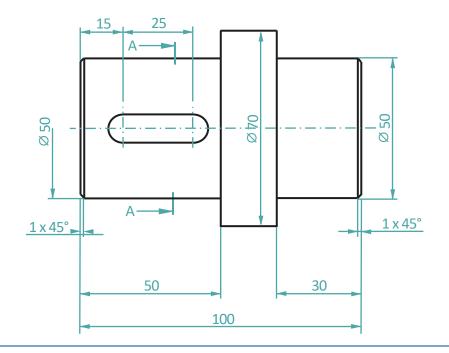

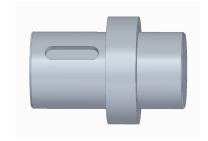

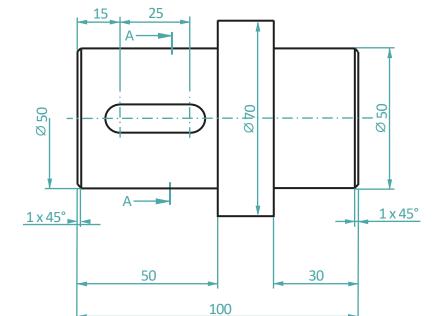

Depth of key notch

addition view needed: sectional view

Aufgabe 7.6: Zeichnen Sie die erforderlichen Ansichten und bemaßen Sie das Bauteil fertigungsgerecht.

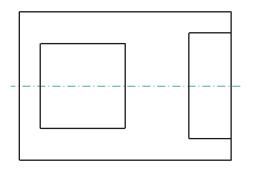

Tutorium 7 - WS 20/21

Aufgabe 7.6: Zeichnen Sie die erforderlichen Ansichten und bemaßen Sie das Bauteil fertigungsgerecht.

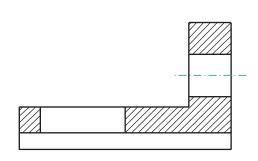

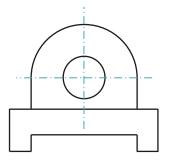

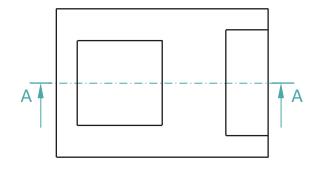

Lösung

Aufgabe 7.6: Zeichnen Sie die erforderlichen Ansichten und bemaßen Sie das Bauteil fertigungsgerecht.

Schnitt A-A

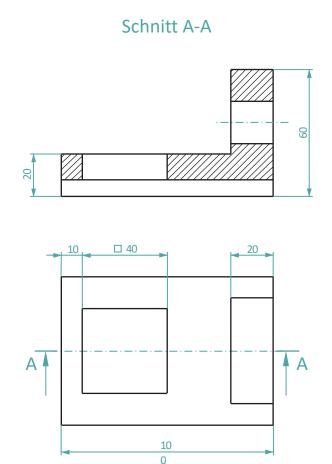

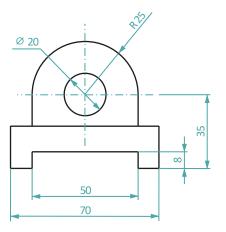

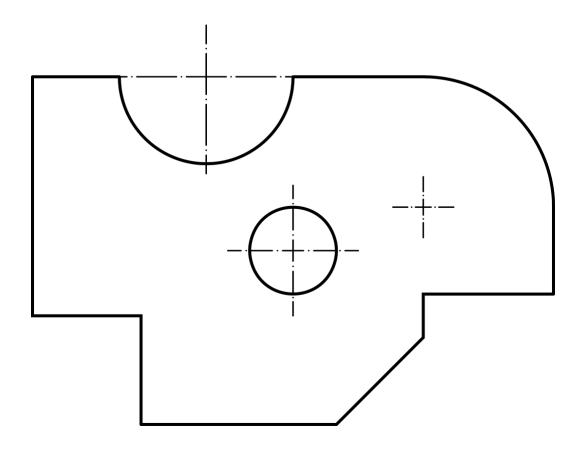

Lösung

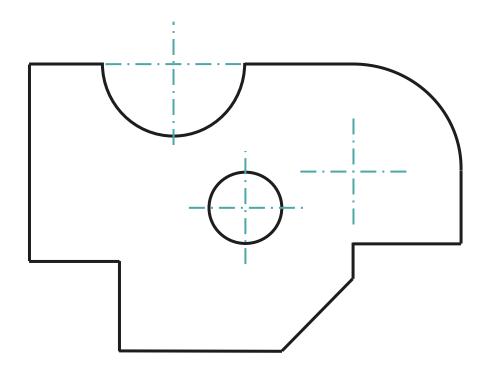

Aufgabe 7.6: Zeichnen Sie die erforderlichen Ansichten und bemaßen Sie das Bauteil fertigungsgerecht.

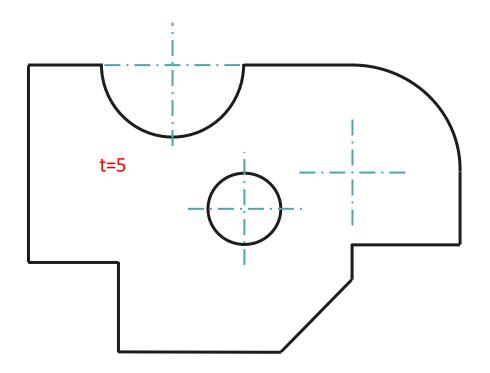

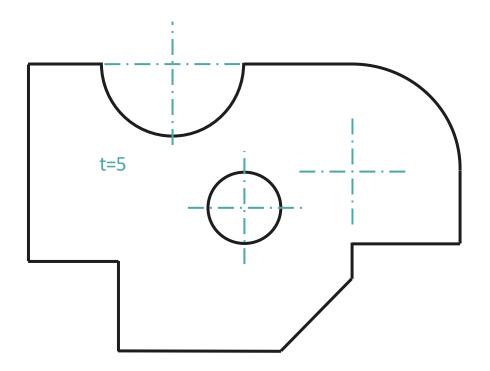

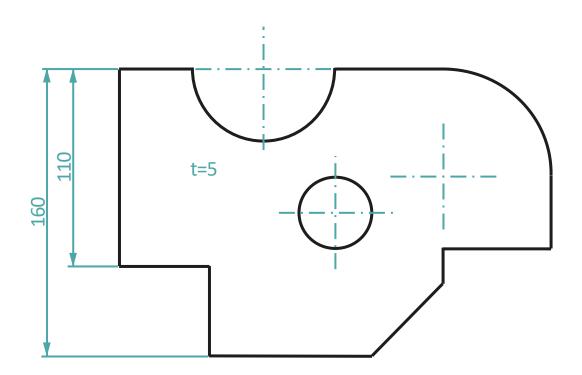

Lösung

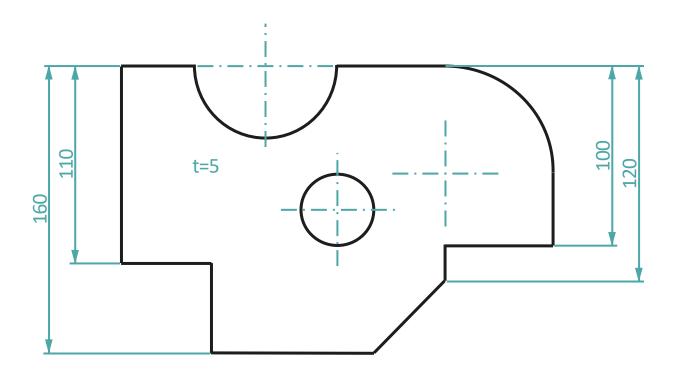

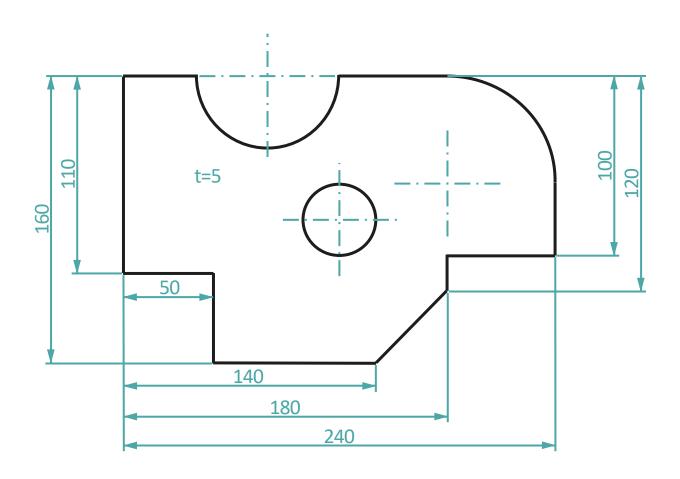

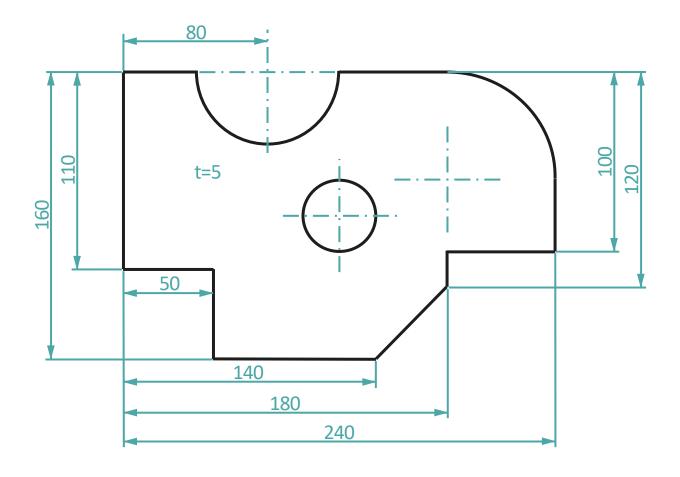

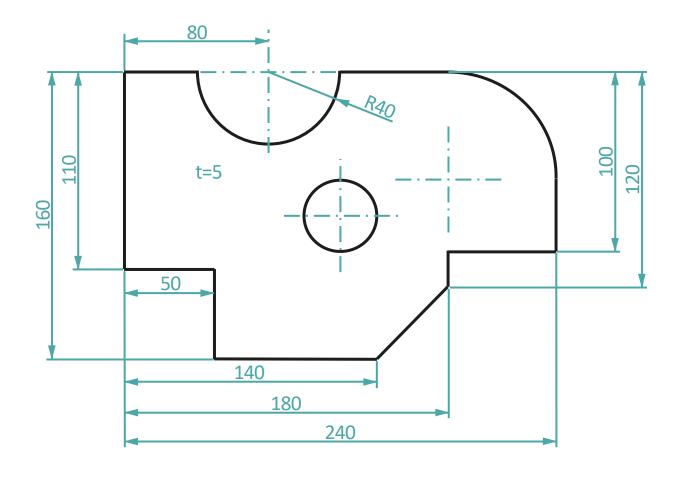

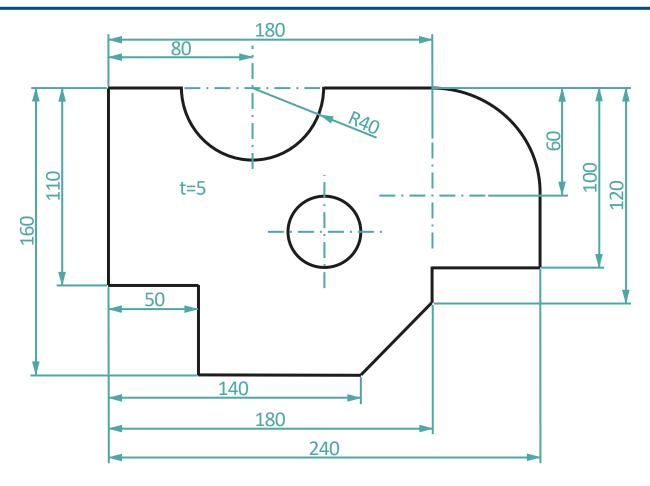

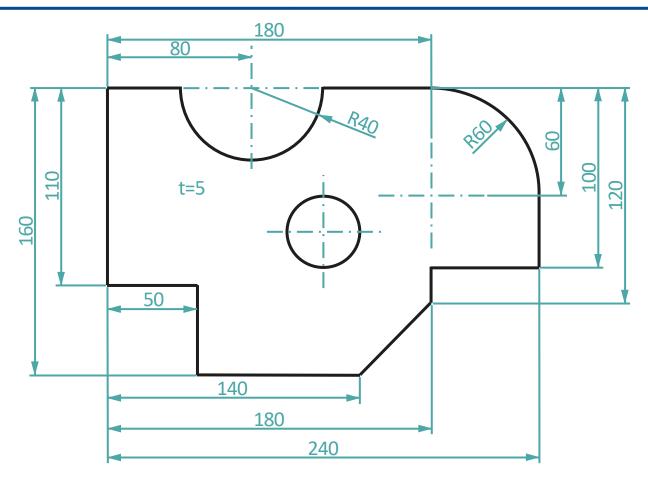

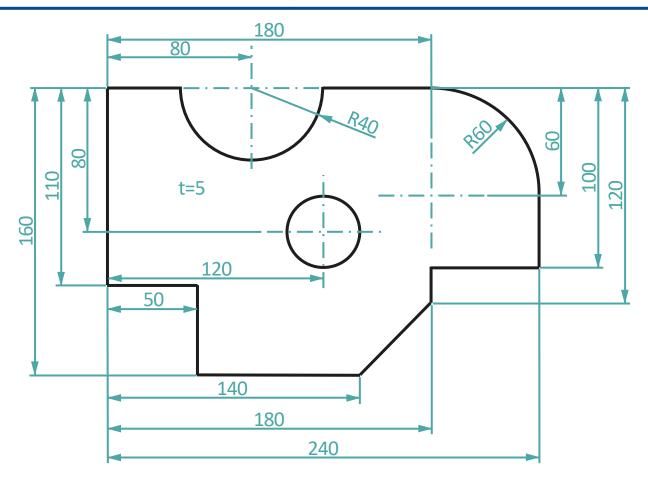

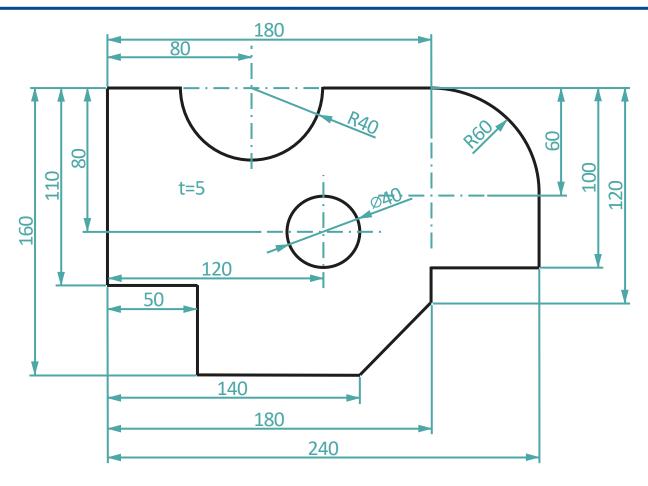

Gliederung

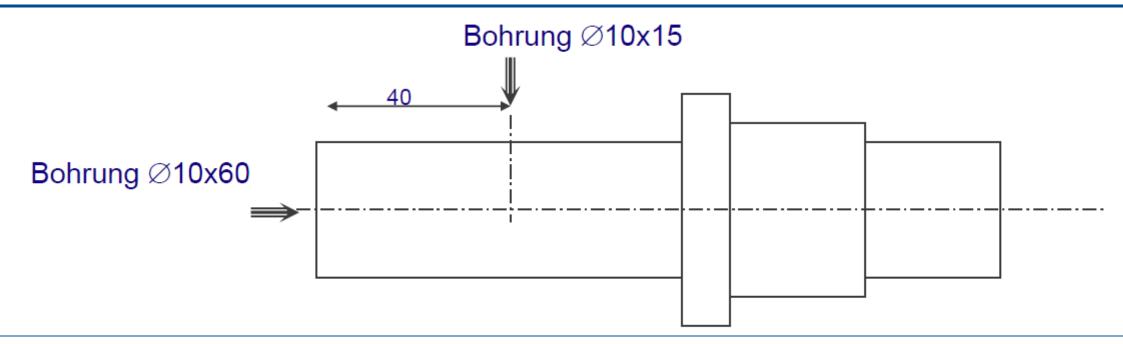

- 1. Aufgaben Übung
- 2. Aufgaben Tutorium
- 3. Zusatzübung

Zusatzaufgabe zur Übung 7 - WS 20/21

Aufgabe 7.8: Zeichnen Sie die erforderlichen Ansichten und bemaßen Sie das Bauteil fertigungsgerecht. Die Blechstärke beträgt 5 mm.

Hinweise:

- Die beiden rechten Wellenabsätze (Ø 30mm und Ø 40mm haben jeweils eine Länge von 30mm. Das linke und rechte Wellenende haben den gleichen Durchmesser (Ø 30mm) und sind mit einer Fase zu versehen (2mm x 45°).
- Die Wellenübergänge zum größten Absatz (Ø 50mm, Breite 10mm) sind zu verrunden (Radius 2mm).
- Das linke Wellenende hat je eine nicht durchgehende Quer- und Längsbohrung mit Ø 10mm.

Zusatzaufgabe zur Übung 7 - WS 20/21
